## FREE Holiday Checks

It is very important to keep your car in tip top condition as this helps to maintain your cars fuel economy, identify any problems before they get serious and maybe costly and to check on any safety aspects.

### **Its your last chance for your FREE Holiday Check**

**Tyres** - Under or over inflated tyres will cause your tyres to wear unevenly, shortening the life of the tyres. The condition of the tyres are important to avoid a blow out.

**Brake Fluid** - This absorbs water and lowers the boiling point, possibly causing the brakes to fail when you need to brake hard on motorways or steep hills.

**Lights** - It is a legal requirement to make sure that all your lights are working.

**Wipers** - Make sure that your wipers clear your screen properly when it pours.

**Oil** - The oil lubricates as well as cleans, the condition is just as important as the level to avoid those costly repairs.

**For peace of mind for any journey  
take the  Holiday Check**
