FREE Drivers Gift Pack

Book your vehicle in for a service in December 2008 and receive a FREE Driver Gift Pack consisting of an ice scraper, a can of de-icer and a de-mister cloth. If you bring this newsletter with you when you drop off your car you will also receive your Free 2009 pocket diary.

Treat your car to some TLC this Christmas

There are many items that need regular maintenance which are not covered in an M.O.T., such as the condition of your brake fluid or anti-freeze..

Brake Fluid constantly absorbs water, therefore reducing the boiling temperature. This means, when you apply the brakes, friction and heat create pockets of gas in the system. These gas pockets will cause the brakes to fail. Pumping the brakes may bring them back but it may already be too late.

Anti-freeze should have a temperature around -20°C for our climate. If the temperature is too low or there is not enough fluid in the system then the engine will overheat. If you continue to drive when the vehicle is overheating this can result in costly repairs and possibly a replacement engine.

We at the FG Group believe that prevention is the best way to go. We carry out a Duty of Care Report and follow up, to advise you of any safety issue that we feel will need doing in the near future. You will then receive a courtesy call nearer the time to invite you in for a FREE follow up check. We can then see if the problem has deteriorated any further and advise you on your best course of action.

Giving you peace of mind, knowing that your vehicle is in safe hands with us.

**We would like to wish you a Merry Christmas
And a Happy New Year from everyone at
The FG Group**
